Vorwort des Verfassers.

Den nachstehenden Catalog meiner Sammlung überlasse ich auf Anregung des Herrn Dr. L. W. Schaufuss in Dresden

demselben zum Druck und bemerke zur Erläuterung:

In systematischer Reihenfolge enthält der Catalog die vorkommenden lebenden Gattungen, so weit sie in meinem Besitze sind. Bei denjenigen Gattungen, welche wegen ihrer grossen Artenzahl oder aus anderen Gründen Unterabtheilungen haben, zeigt die, der Art vorgedruckte Zahl die Unterabtheilung an, deren Namen sich in der, dem Catalog vorangehenden systematischen Uebersicht, mit correspondirender Zahl befindet. Chen u's Manuel de Conchyliologie, Paris II. Vol. 1859-62 ist als Grundlage für die Arbeit genommen, und nur bei den Pneumonopomaceen und Auriculaceen habe ich nach Pfeiffer, bei den Heliceen nach Albers-Martens geordnet; endlich sind aber auch die seit 1862 aufgestellten und angenommenen neuen Gattungen an den betreffenden Stellen eingereiht.

Dem nachfolgenden Cataloge steht die möglichst vollständige Uebersicht aller lebenden und Schalen tragenden Mollusken in systematischer Reihenfolge voran; die Synonyma, ebenso alle Untergatungen sind angegeben, welches für den Catalog selbst wesentlich nothwendig war, um unnütze Wiederholungen zu vermeiden. Dass sich viele Lücken vorfinden werden und dass das Verzeichniss nicht frei von Fehlern und Irrthümern sein kann, liegt in der Natur der Sache. Für eine fernere, verbesserte Auflage würden mir Berichtigungen, die auch ich möglichst nach-

tragen werde, höchst erwünscht sein.

Es wird mir zu besonderer Freude gereichen, wenn meine Leistung den Conchyliologen von Fach, wie den Sammlern angenehm ist.

Berlin, 1. October 1868.

Fr. Paetel.

AND THE STATE OF THE PROPERTY OF THE PROPERTY

Vorwort des Herausgebers.

Indem ich vorliegenden Catalog der reichen Conchyliensammlung des Herrn Fr. Paetel dem Sammler zur Benutzung als Tausch- und Anordnungs-Catalog übergebe und empfehle, lebe ich nicht in der trügerischen Hoffnung, der Wissenschaftler, der Gelehrte werde denselben so freudig begrüssen, wie es der Catalog verdient.

Einer Entschuldigung, dass der Catalog überhaupt erscheint, bedarf es nicht. Hätte Herr Paetel glänzen wollen mit seiner prächtigen Sammlung, so konnte er den Catalog selbst drucken lassen. Da ich aber die Herausgabe übernahm und der Verfasser nur die Arbeit gehabt hat, so sei es gestattet das Unter-

nehmen zu motiviren.

Seit einer Reihe von Jahren habe ich durch meine Naturalienhandlung die Erfahrung gemacht, dass diejenigen Zweige der Wissenschaft, welche die am leichtesten zugängliche Literatur besitzen, am meisten in das Volk eingedrungen sind. Die Objecte anderer Zweige werden hin und wieder als Curiosa oder nur wegen ihrer Schönheit als Schmuckgegenstände für Zimmer, Etagèren etc. betrachtet. So gut nun den Anstoss zu meiner wissenschaftlichen Laufbahn eine richtig etiquettirte Helix hortensis gegeben hat, ebenso leicht stelle ich mir vor, werden sich nach und nach aus den blossen Conchylien-Sammlern nicht blos Schüler der Wissenschaft, sondern auch wirkliche Gelehrte herausbilden können — wenn der erste Anstoss gegeben wird. Durch Scholtz, Stein und in grossem Maassstabe durch meinen unvergesslichen Freund Rossmässler ist das Bestimmen uns zunächstliegender Conchylien heutzutage wesentlich erleichtert und man findet in Schulen oder mehr bei den, die Naturwissenschaft vortragenden Lehrern (denn in den allermeisten Schulen selbst wird leider auf naturwissenschaftliche Sammlungen viel zu wenig oder nichts verwendet, so dass ein armer Lehrer, und deren giebt es gar manche, sich sein Material, wenn er wirklich mit Nutzen für die Schüler lehren will, ausserhalb des Schulhauses dürftig aufsuchen muss) schon Sammlungen, die der Mühe werth sind geordnet zu werden. Findet nun ein Ordnen solcher Sammlungen nach den Handbüchern für Schulen und Gymnasien statt, so geht dabei in den meisten Fällen der Sinn für einen weiteren Ausbau verloren, wenn nicht Gelegenheit geboten ist, dem Wissbegierigen für wenige Groschen 1) ein Verzeichniss der Objecte, die beschrieben, 2) eine Anweisung, wie dieselben hintereinander einzurangiren sind, zu beschaffen. Und diesen Zweck allein soll vorstehender Catalog annähernd erreichen und dadurch den Sinn und die Liebe zur Conchyliologie heben, ähnlich wie dies der entomologische Verein in Stettin durch die Herausgabe der ersten Cataloge über europäische Käfer in erfreulichster Weise erreichte.

Dem vorliegenden Werkehen wird das beigegebene System der Malacozoologie gewiss auch Eingang in die Museen und grösseren Bibliotheken verschaffen. Es ist nur als Vorläufer zu einem completten Cataloge zu betrachten und mussten deshalb die Synonyma der Arten, sowie Citate vorerst weggelassen werden, um die gesteckte Grenze nicht zu überschreiten.

Schliesslich sei erwähnt, dass in Nachfolgendem von mir nur das Register und einige Umänderungen in der Nomenclatur herrühren; am Cataloge änderte ich selbstverständlich nichts, so gern ich auch strenge Durchführung des Prioritätprincipes, Vermeidung von Synonymen und Gleichförmigkeit in der Bezeichnung der Vaterländer gesehen hätte. Helfe Jeder daran und wir kommen zum Ziel!

Für vergebene Gattungsnamen, z. B. Cantharis (welcher von Linné's Zeiten bis jetzt nach allen Dimensionen ge- und verbraucht ward) Acicula, Faula etc. erlaubte ich mir andere vorzuschlagen.

Dresden, im December 1868.

Dr. L. W. Schaufuss.

Register.

N.B: Gattungsnamen, Gattungssynonyme und Untergattungen sind mit der Gattungsnummer versehen und nach dieser im Systeme aufzusuchen.
